

# CABLE KOM

GigaKOM offers you the ultimate cabling solution and installation from the best manufacture in the industry, including copper and fiber optic solutions. We can also assist you in physical design, topology and documentation.

## **Cablekom:**

Computer connectivity cabling solutions and professional installations. If it interconnects computers or devices, from GBICs to multi-strand optical fiber to CAT6 copper, we have the right solution for your project.

## BENEFITS

### **Save Money**

We have partnered directly with industry leading manufacturers to pass savings to you.

### **Save Time**

Our manufacturers stock sub-semblies to ensure short leadtimes.

### **Quality Assurance**

Professional installation guarantees that your cables are installed correctly meeting all local codes and performance guidelines.

## DID YOU KNOW?

The weakest link in 90% of networks are cable assemblies.

### **Solution:**

GigaKOM will select the correct cable for the correct application to obtain maximum throughput.

The only way to ensure reliability in fiber optics is to use cables manufactured and tested in a lab.

### **Solution:**

We only use factory made and tested fiber optic cables with certified test results.
