

# SECURE KOM

GigaKOM offers our customers the best customized network security solutions. Our engineers meticulously detail and implement the best security system solutions for your defined specifications.

## SecureKOM Defined

**SecureKOM (si-'kyur-käm):** Security network design vulnerability assesment and testing. Development of security policies and disaster recovery plans.

## BENEFITS

### Save Money

A well designed and implemented security system can pay for itself after the first attack.

### Save Time

Continuous testing and evaluation of your current systems will keep them safe and secure against newly developed attacks and viruses.

### Assurance

Provides peace of mind that your systems have been fully tested and secured.

## DID YOU KNOW?

**The best defense to attacks is to continually test, evaluate and monitor your network.**

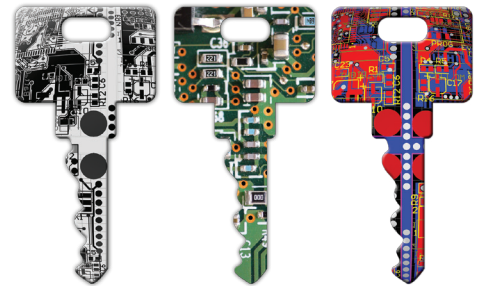

### Solution:

Implement GigaKOM's exclusive security maintenance contracts.

**Simply updating your security software is not enough to fully protect a network.**

### Solution:

Let GigaKOM asses your network and make recommendations that effectively protect your critical network needs.
