SYS KOM

GigaKOM's extensive experience and knowledge in network systems and configurations can assist you in optimizing the performance and reliability for your critical applications.

SysKOM Defined

SysKOM ('sis-käm): Installation, migration, configuration and optimization of system applications and infrastructure of network system.

BENEFITS

Save Money
Utilize our extensive experience and knowledge to configure your systems correctly the first time.

Save Time
Optimization dramatically reduces any potential conflicts and errors.

Assurance
Fully optimized and configured systems will extend the life-span of the network and avoid premature upgrades.

DID YOU KNOW?

90% of current network infrastructures are not optimized.

Inproperly configured system applications can cause significant network performance degradation.

Solution:
GigaKOM can provide a non biased evaluation of your systems configuration.

Solution:
GigaKOM can upgrade, optimize and support your critical system applications.
