

WIRELESS KOM

GigaKOM offers industry leading wireless systems and wireless security solutions to upgrade your network infrastructure. Wireless Kom, GigaKOM's wireless product lines, offer you cost effective solutions for your wireless applications.

WirelessKom defined:

Installation, migration, and configuration of wireless network systems, infrastructure and security applications.

BENEFITS

Save Money

Wireless access can be more cost effective than installing hard wire drops.

Save Time

Implementing wireless access will make your staff more productive by allowing access anywhere they need it.

Assurance

The latest technology provides security comparable to hard wired networks.

DID YOU KNOW?

Integrating a wireless solution is not as costly as you may think.

Solution:

A wireless network can be the most cost effective solution to expanding network access.

Choosing the correct protocol and authentication is crucial to wireless network efficiency and security.

Solution:

Let GigaKOM asses your network and make recommendations that best suit your network needs.
